Yasin Ömer
Kara
Cloud&Data Platforms Engineer

I'm just graduated from Kocaeli University Computer Engineering Departmant.

During my college years, I'm worked at Softtech as a Jr. Android Developer ,at Kocaeli University Image Processing Ar-Ge Lab as an Image Processing and Embedded System Researcher Intern and now at Koç Sistem as a Cloud&Data Platform Engineer.

You can reach the in-company projects I have done in the places I worked from my CV, and can reach my individual and university projects and certificates on GitHub(~directory name : AboutMe). And finally, you can find my articles about the new developments that I follow on Medium or the compilations about the topics that I am in the learning process.

• Work History

2022-02 – 2022-04
